SUMMARY

Junior Front-End Developer with a solid foundation in building responsive, user-friendly web applications. Highly focused on writing clean, maintainable code, Experienced in modern front-end workflows, responsive design, and version control. Eager to bring my technical skills in React and Next.js to a dynamic development team and problem-solving mindset to a dynamic development team where I can contribute to impactful projects and continuously grow.

EDUCATION

B.Sc. in Computer Science. Zagazig University.
Grade: Very Good.

.2019 - 2023

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3.
- **Styling & UI:** CSS3, Tailwind CSS, Sass, Bootstrap.
- **Libraries & Frameworks:** React.js, Next.js, Redux / Redux Toolkit.
- **Tools & Version Control:** Git, GitHub.

PROJECTS

• E-Commerce Website.

Live Demo(<https://dukkaneke-app-store.vercel.app/>)

- Developed a high-performance, fully responsive digital marketplace application using React and React Router v7.
- Integrated Clerk Authentication for secure, multi-tier user sign-in, sign-up, and session management.
- Built a modern, sleek UI using the latest Tailwind CSS v4, implementing interactive elements like touch-responsive carousels (React Slick) and dynamic notifications (React Toastify).
- Handled efficient API communication and data fetching using Axios.

• Dashboard.

Live Demo(<https://admin-dashboard-beta-self-17.vercel.app/>)

- Developed a high-performance, responsive analytics dashboard using React, Vite, and TypeScript for absolute type safety.
- Implemented interactive, data-driven charts and metrics utilizing Recharts to visualize complex data structures.
- Engineered a fully responsive layout with seamless Dark/Light mode toggling using Tailwind CSS.
- Focused on clean code architecture and optimized asset bundling for rapid loading times.

• AI Business Solutions Landing Page(AI-Boost).

Live Demo(<https://modern-landing-page-sable-omega.vercel.app/>)

- Developed a modern, type-safe landing page for an AI agency designed to showcase artificial intelligence solutions using React, Typescript, and Tailwind CSS.
- Built reusable components with strict Typescript interfaces, ensuring clean code and pixel-perfect design.
- Optimized bundling and performance using Vite, and deployed the live app via Vercel through GitHub.
