Mohab Elsayed

REACT / FRONTEND DEVELOPER

mohabelhashem@gmail.com • +201080592399 • LinkedIn • GitHub • Portfolio

SUMMARY

Detail-oriented Frontend Developer specializing in React, Next.js, and TypeScript. Experienced in building responsive, high-performance web applications using Tailwind CSS, Redux Toolkit, and REST APIs. Focused on Writing clean, maintainable code and scalable UI architecture.

SKILLS

Core Technologies: JavaScript (ES6+), TypeScript, React.js, Next.js (App Router)

Styling & UI Systems: Tailwind CSS, shadcn/ui, Responsive Web Design, CSS3/Sass

Form & API Workflows: REST APIs integration (Axios), Form Validation (React Hook Form, Zod)

Interface Delivery: Performance Optimization, Cross-Browser Compatibility, Accessibility Standards

Quality & Developer Tools: Git/GitHub, Vercel, Chrome DevTools, ESLint, Postman, Vite.

PROJECTS

Modern Admin Dashboard

Live Demo | GitHub Repo

Tech Stack: Next.js (App Router), React, TypeScript, Tailwind CSS, shadcn/ui, TanStack Table, Recharts, Zod

- Engineered a high-performance, responsive admin dashboard utilizing Next.js (App Router) & TypeScript for server-side rendering, achieving 90+ Google Lighthouse performance scores.
- Implemented interactive data visualizations using Recharts and engineered sortable, paginated data tables powered by TanStack Table.
- Designed a modern UI with shadcn/ui and Tailwind CSS, featuring seamless Dark/Light mode toggling and client-side preferences persistence.
- Integrated dynamic real-time mapping via Pigeon Maps and built robust form validation workflows using React Hook Form and Zod, Eliminating runtime submission errors.

E-Commerce Website (Dukkanek)

Live Demo | GitHub Repo

Tech Stack: React.js, React Router v7, Redux Toolkit, TypeScript, Tailwind CSS, Clerk Auth, Axios

- Developed a high-performance, responsive digital marketplace featuring +20 dynamic products with seamless client-side routing and state navigation.
- Architected dynamic shopping cart state management and persistence using Redux Toolkit with strict TypeScript typing, reducing redundant re-render by 40%.
- Integrated Clerk Authentication for secure user sign-in, account authorization, and session persistence across routes.
- Designed an interactive UI featuring touch-responsive product carousels and dynamic toast notifications.
- Optimized asynchronous API communication with Axios interceptors, managing complex data workflows while gracefully handling 100% of runtime API errors.

QuickStay - Hotel & Room Booking Application

Live Demo | GitHub Repo

Tech Stack: React.js, React Router v6, TypeScript, Tailwind CSS, Clerk Auth

- Architected a full-featured booking platform connecting guests with property owners, managing dynamic room discovery and listing workflows across 20+ property units.
- Implemented Role-Based Access Control (RBAC) via Clerk Auth for 2 distinct user roles (Guests & Owners), securing 100% of owner dashboard and booking routes.
- Built an interactive Owner Dashboard supporting full CRUD operations, multi-image uploads, and real-time room availability toggles with <100ms UI update speed.
- Crafted a modern, mobile-first UI using Tailwind CSS with backdrop-blur styling and custom animations, ensuring seamless responsiveness across 100% of screen viewports.

- Optimized application routing and global state flow utilizing React Router and strict TypeScript typing, eliminating runtime type errors across all application modules.

EDUCATION

B.Sc. in Computer Science — Zagazig University | *Graduated: 06/2023* (Grade: Very Good)
