SUMMARY

Detail-oriented Frontend Developer with a solid foundation in building responsive, scalable, and user-friendly web applications. Proficient in React, Next.js, TypeScript, Tailwind, and Redux Toolkit. Focused on writing clean, maintainable code, optimizing performance, and integrating APIs to deliver seamless user experiences.

EDUCATION

B.Sc. in Computer Science, Zagazig University — *Grade: Very Good* 2019 – 2023

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Styling & UI: Tailwind CSS, Shadcn UI, Sass, Bootstrap

Libraries & Frameworks: React.js, Next.js, Redux Toolkit, TanStack Table, React Hook Form, Zod

Tools & Platforms: Git, GitHub, REST APIs, Vite, Axios

PROJECTS

Modern Admin Dashboard

Live Demo | GitHub Repo

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Shadcn UI, TanStack Table, Recharts, Zod

- Engineered a high-performance admin dashboard utilizing Next.js (App Router) and TypeScript for server-side rendering.
- Implemented interactive data visualizations using Recharts and engineered sortable data tables powered by TanStack Table.
- Designed a responsive UI with Shadcn UI and Tailwind CSS, featuring seamless Dark/Light mode toggling and client-side data persistence.
- Integrated dynamic real-time mapping via Pigeon Maps and built robust form validation workflows using React Hook Form and Zod.

E-Commerce Website (Dukkanek)

Live Demo | GitHub Repo

Tech Stack: React, React Router v7, TypeScript, Tailwind CSS, Clerk Auth, Axios

- Developed a high-performance, responsive digital marketplace with seamless routing and state navigation.
- Enforced strict type safety across components and API responses using TypeScript.
- Integrated Clerk Authentication for secure user sign-in, account authorization, and session persistence.
- Designed an interactive UI featuring touch-responsive carousels and dynamic toast notifications.
- Optimized asynchronous API communication and complex data fetching workflows using Axios.

QuickStay – Hotel & Room Booking Application

Live Demo | GitHub Repo

Tech Stack: React, React Router v6, TypeScript, Tailwind CSS, Clerk Auth

- Architected a dynamic web app connecting guests with property owners for room discovery and listing management.
- Integrated Clerk Auth to handle role-based access, guest bookings, and owner dashboard privileges.
- Built an Owner Dashboard supporting full CRUD operations, image uploads, and real-time availability toggles.
- Crafted a modern, responsive UI using Tailwind CSS with backdrop-blur styling and custom animations.
- Optimized routing and global state flow utilizing React Router and strict TypeScript typing.
